BUS-STOP: EMPIRE BUS-STOP

ALTERNATIVE ADDRESS; 129, FUNSHO WILLIAMS AVENUE, SURULERE, LAGOS

HISTORY

Pharmforte Network Limited started operations on December 1st 2004 in response to the need for professional middlemen in the Nigerian drug distribution system. Over the years the company has grown to become a major player and a force to reckon with in the pharmaceutical distribution chain.

The history of drug distribution in Nigeria is peculiar. Drugs are sold freely in open markets, hawked on the streets, peddled by all manner of persons who have little or no relevant training at all. This is a major challenge for the healthcare sector. The government has tried to make laws to regulate the drug distribution but enforcing the laws has been a colossal failure. Pharmforte Network Limited, owned by a consortium of Pharmacists, ensures that genuine pharmaceuticals , medical consumables and equipments get to Pharmacies, Clinics/hospitals and Institutions and ultimately to the patients at good prices and in good conditions.

Overview of Nigerian Drug Distribution Channel

The major challenge of drug distribution in Nigeria is faking and adulteration of products. This has taken different dimension and shape. The hydra headed monster has pervaded our health sector and made futile so many efforts of government and private sector at ensuring that only wholesome products are marketed and sold in Nigeria. The reason is simple. Drugs are sold and handled by both qualified and unqualified people. Pharmforte Network Ltd came into the scene to help sanitize the drug distribution chain. That is, to connect manufacturers and importers of pharmaceutical products to pharmacies, hospitals and Institutions and to ultimately help in improving the quality of healthcare delivery in Nigeria.

Overview of Nigerian Drug Distribution Channel

A second dimension to the drug distribution problem is that of storage. Often, products aren't stored at recommended conditions especially where temperatures restrictions are involved, thus the integrity of the products is compromised before they get to the pharmacies and hospitals. Pharmforte Network Limited ensures that products are optimally stored and quality guaranteed until they are handed over to our customers so Pharmforte Network Ltd is actually a bridge between manufacturers and importers on one side and the retail pharmacies, hospitals and institutions on the other.

Mission

Our mission is to provide a wide range of pharmaceuticals, home and personal care products at optimal prices in a convenient shopping environment to make re-stocking a delightful experience for pharmacists and other health professional.

Vision

To become the conveniently reachable one-stop stocking center for pharmacies, clinics, hospitals and health institutions; providing good quality, well stored, genuine products at optimal prices.
